

SAAEDA SAAD

Full Stack Software Engineer | MERN Stack | AI-Integrated Web Development
Quetta, Balochistan, Pakistan | [REDACTED] | [REDACTED]
github.com/saeedasaad | linkedin.com/in/saeeda-saad-webdeveloper

PROFESSIONAL SUMMARY

Results-driven Full Stack Software Engineer with hands-on experience architecting and deploying scalable MERN stack applications across 4+ internship engagements in fast-paced, Agile environments. Proven ability to design RESTful APIs, implement JWT-based authentication with role-based access control (RBAC), and deliver responsive, modular UIs using React.js and Tailwind CSS. Experienced with containerisation (Docker), CI/CD pipelines, and relational databases (PostgreSQL, MySQL) alongside NoSQL (MongoDB). Currently expanding expertise into Next.js and AI-integrated web development. Track record of delivering production-grade features including a multi-role Learning Management System and a full-stack Gym Management System—both with real-world deployment practices. Seeking a mid-level engineering role where technical depth, clean architecture principles, and growth in AI engineering can drive measurable business outcomes.

CORE COMPETENCIES

React.js / Redux Toolkit	Node.js / Express.js	RESTful API Design	JWT Auth & RBAC
MongoDB / Mongoose	PostgreSQL / MySQL	Docker & CI/CD	Next.js (advancing)
Tailwind CSS / Bootstrap	Git / GitHub / Agile	Input Validation & XSS/CSRF	Responsive UI Design

PROFESSIONAL EXPERIENCE

MERN Stack Development Intern | U Devs Dec 2025 – Present | Remote

- Architected and shipped 3+ full-stack features using React.js, Node.js, and Express.js, reducing page load time by optimising API payloads and introducing lazy loading.
- Designed and tested CRUD RESTful APIs with Postman, achieving 100% endpoint coverage and eliminating pre-release bugs in the staging environment.
- Collaborated with a cross-functional team of 5 engineers in a Scrum workflow, contributing to sprint planning, code reviews, and daily stand-ups via Git branching strategy.
- Integrated frontend and backend systems with a focus on performance, scalability, and modular code architecture, improving component reusability by ~40%.

Full Stack Web Development Intern | Apexcify Technologies Nov – Dec 2025 | Remote

- Developed and optimised 6+ frontend features using React.js, improving UI responsiveness and reducing render cycles through memoisation and Context API state management.
- Integrated REST APIs into a Gym Management System, enabling real-time dashboard updates for membership, attendance, and billing modules.
- Contributed to UI/UX improvements aligned with Google UX Design principles, enhancing end-user task completion flow for gym administrators.

Web Development Intern | Hex Softwares Oct – Nov 2025 | Remote

- Built pixel-perfect, cross-browser-compatible responsive UIs using React.js, HTML5, CSS3, and JavaScript (ES6+), supporting mobile and desktop viewports.
- Diagnosed and resolved 10+ production bugs in backend modules, improving system stability and reducing error-log frequency by 30%.

- Participated in code review cycles, applying clean-code standards and ensuring consistent naming conventions across the codebase.

Web Development Intern | Digital Empowerment Network

Jul – Sep 2025 | Virtual

- Developed 5+ responsive web pages integrated with third-party APIs, delivering dynamic data rendering for an information portal used by 200+ community members.
- Built 2 end-to-end MERN stack applications in a collaborative team environment, applying version control best practices and modular component architecture.
- Completed Google UX Design-informed wireframing exercises prior to implementation, reducing revision cycles and aligning deliverables with stakeholder expectations.

TECHNICAL PROJECTS

Learning Management System (LMS) — *React.js · Node.js · Express.js · PostgreSQL · JWT · Docker · CI/CD*

- Designed and implemented a multi-role LMS with distinct Admin, Instructor, and Student dashboards, supporting role-based access control (RBAC) via JWT and middleware guards.
- Engineered a PostgreSQL relational schema handling users, courses, enrollments, and assessments; wrote optimised SQL queries reducing average response time by 35%.
- Developed 20+ RESTful API endpoints with structured error handling, input validation, and Postman-documented contracts, enabling clean frontend-backend decoupling.
- Applied Docker containerisation and CI/CD pipeline practices (GitHub Actions-compatible), enabling repeatable builds and one-command deployment.
- Built a reusable component library of 15+ UI components with Tailwind CSS, reducing feature development time by ~25% on subsequent sprints.

Gym Management System — *React.js · Node.js · Express.js · MongoDB · REST APIs*

- Delivered full-stack membership and attendance management features; implemented role-based dashboards for Admin and Member personas with separate API access scopes.
- Built RESTful APIs for membership plans, check-ins, and billing with Mongoose schemas and input sanitisation to mitigate injection risks.
- Improved UI responsiveness across 5 core views, increasing mobile usability scores from poor to acceptable in cross-device testing.

E-Commerce Web Application — *React.js · Node.js · MongoDB · REST APIs · Context API*

- Implemented product listing, search, and filtering interface consuming REST APIs, supporting dynamic data rendering for 100+ product records with sub-200ms response time.
- Developed cart, checkout, and order-flow modules using Context API for global state, eliminating prop-drilling across 8 nested component layers.
- Delivered a fully responsive storefront compatible with mobile, tablet, and desktop breakpoints using Tailwind CSS utility classes.

EDUCATION

B.Sc. Computer Science | Sardar Bahadur Khan Women's University, Quetta 2022 – 2026 (Expected)

Relevant Coursework: Data Structures & Algorithms, Database Systems, Software Engineering, Operating Systems, Computer Networks, Object-Oriented Programming.

CERTIFICATIONS & TRAINING

- **Google UX Design Certificate** — Coursera / Google (Nov 2023)
- **Advanced Web Application Development** — College of International Skills Development, Quetta (Oct 2024)
- **Web Development** — Digital Youth Empowerment — Balochistan Chapter (Feb 2025)

- **Python Programming** — [HyperLink](#) (Feb 2026)

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), React.js, Redux Toolkit, Context API, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, RESTful API Design, Next.js (advancing)

Databases: MongoDB, Mongoose ODM, PostgreSQL, MySQL

DevOps & Tools: Git, GitHub, Docker, CI/CD, Postman, Netlify, Visual Studio Code

Security: JWT Authentication, Role-Based Access Control (RBAC), Input Validation, XSS & CSRF Mitigation, SQL/NoSQL Injection Prevention

Languages: English (Professional), Urdu (Native)
