PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience designing, building, and deploying scalable web applications using the MERN stack (React.js, Node.js, Express.js, MongoDB) and PostgreSQL. Proficient in RESTful API development, JWT authentication, role-based access control (RBAC), and responsive UI design. Expanding expertise into Next.js and AI-integrated web development. Committed to clean architecture, modular code, and performance optimization.

EXPERIENCE

MERN Stack Development Intern — U Devs (Remote) (Dec 2025 – Present)

- Developed full-stack web applications using React.js, Node.js, and Express.js.
- Built and tested RESTful APIs with full CRUD functionality using Postman.
- Collaborated with team via Git in an Agile (Scrum-based) workflow.
- Integrated frontend and backend systems with a focus on performance and scalability.

Full Stack Web Development Intern — Apexify Technologies (Remote) (Nov – Dec 2025)

- Developed and optimized frontend features using React.js; improved UI responsiveness.
- Integrated REST APIs and contributed real-world functionality to a Gym Management System.

Web Development Intern — Hex Softwares (Remote) (Oct – Nov 2025)

- Built responsive UIs using React.js, HTML, CSS, and JavaScript.
- Supported backend functionality and resolved bugs to improve application stability.

Web Development Intern — Digital Empowerment Network (Virtual) (Jul – Sep 2025)

- Developed responsive web pages and integrated third-party APIs.
- Built MERN stack applications in a collaborative, team-based environment.

PROJECTS

Learning Management System (LMS)

- Built a scalable full-stack application using React.js, Node.js, Express.js, and PostgreSQL.
- Implemented RBAC for Admin, Instructor, and Student roles with JWT authentication.
- Designed a modular, responsive UI with reusable components and proper error handling.
- Applied Docker and CI/CD pipelines for streamlined deployment.

Gym Management System

- Developed full-stack features using React.js and Node.js with role-based dashboards.
- Built REST APIs and improved UI responsiveness and overall user experience.

E-Commerce Web Application

- Created a product listing interface with API integration and dynamic data rendering.
- Implemented core e-commerce functionalities using the MERN stack.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), React.js, Redux Toolkit, Context API, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, RESTful APIs, Next.js (in progress)

Databases: MongoDB, Mongoose, PostgreSQL, MySQL

Tools & Platforms: Git, GitHub, Postman, Netlify, Docker, CI/CD, Visual Studio Code

Security & Concepts: JWT Authentication, RBAC, Input Validation, XSS/CSRF/Injection Prevention, Modular Architecture

EDUCATION

Bachelor of Science in Computer Science — Sardar Bahadur Khan Women's University, Quetta (2022 – 2026)

Higher Secondary Certificate (Pre-Engineering) — Govt. Girls College, Mastung (2019 – 2020)

Secondary School Certificate (Science) — Danish Model High School, Mastung (2017 – 2018)

CERTIFICATIONS

- Python Programming — HyperLink (Feb 2026)
- Web Development — Digital Youth Empowerment, Balochistan Chapter (Feb 2025)
- Advanced Web Application Development — College of International Skills Development, Quetta (Oct 2024)
- Google UX Design — Coursera (Nov 2023)
